

## JOB POSTING

### Renewable Energy Technician

*It is our strong preference to hire someone with experience living and working in Indigenous communities. We encourage applicants to share their level of experience in this regard during the hiring process (resume/cover letter/interview).*

#### Who We Are

Barkley Project Group (BPG) is a small consulting firm specializing in project management services to develop community-owned clean energy projects and implement energy efficiency initiatives.

We currently work with more than 30 First Nations communities within British Columbia and the Yukon. Our projects focus on best-fit opportunities for each client and range from developing hydro, solar, wind, biomass, marine and geothermal energy. Some projects displace community diesel systems, while others generate commercial revenues on a larger scale. Our job is to support Nations by providing project management and administration capacities on a project-specific basis. We are passionate about the work we do, and we are grateful for the opportunities to work with the communities pursuing a more sustainable future.

We focus on a community-centric approach where our clients own and control their clean energy developments and energy efficiency projects. We also have a solid understanding and track record of securing government funding to support project development. Our most important guiding principle is to ensure that project benefits align with community priorities. This approach has been well received by government funders, which, in turn, reduces financial risks for our clients.

#### Core Values

Barkley Project Group employees lead all activities according to our six core values: Trust, Integrity, Respect, Innovation, Humor, Happiness.

#### Reconciliation Action Plan (RAP)

Barkley Project Group is actively developing an internal RAP program that will help guide our future policies and actions. New employees will be encouraged to review our RAP program to date and participate in the continual development.

#### Job Summary

We are hiring a full-time position for the role of **Renewable Energy Technician** with our **Project Operations and Development Teams**. In order to effectively support this position, the successful applicant must live on Vancouver Island within the mid-Island area, (Nanaimo or surrounding area).

The successful candidate will support both the development and operations departments providing high quality, professional operational support services to active and developing electric

generating facilities and potentially other community infrastructures. This position requires a working environment that will include in-office, from home and on-site operations. The successful candidate would also be required to travel and be away for short periods to support remote project activities.

Key tasks for this position include:

- Supporting existing hydro plant operators in all matter related to safe and efficient plant operations
- On-site tool-based maintenance and troubleshooting using a broad array of skills
- Assist the Barkley Project Group team in the evaluation and deployment of energy efficiency solutions
- Assist in the training of new plant operators
- Providing 24/7 remote assistance via online platforms
- Manage and support contractors in heat pump installation programs
- Provide design support for photovoltaic (PV) systems
- Troubleshooting and installation of private electrical consumption meters

### **Responsibilities**

Reporting to the Operational and Development Managers, your duties include but are not limited to:

- Monitoring and ensuring generation facilities are operating and generating at full potential
- Problem-solving, research and development to ensure operations are technically current
- Support plant operators 24/7 with regards to plant alarms, plant trips/shutdowns and or emergency repairs
- Reviewing operator(s) site inspections, providing feedback while continually developing and improving the operator's ability to perform and manage their role
- Managing energy efficiency program such as commercial lighting upgrades
- Coordinate tasks to ensure quality, consistency, and the completion of deliverables on time and within budget
- Maintain clear records of the tasks, activities, and details of your work
- Adhere to all Company policies and procedures, including safety
- Contribute ideas, energy, and personal commitment to help foster a positive and rewarding work environment and to help maintain and grow a successful, innovative, high-quality project management consulting practice at Barkley Project Group

### **Qualifications**

#### Education

- RSE Electrician
